

Project: The Soccer Factory, Rochdale

Product: Conqueror 60MF

## The Soccer Factory, Rochdale

### The Challenge

Located in Rochdale, The Soccer Factory has a total of 10 pitches and is home to one of the largest indoor pitches in the northwest. Open all-year-round, the pitches are regularly used by professional football clubs as well as local junior teams.

Next to The Soccer Factory stood a wasteland with much potential for them to expand even further. Before any decision making was done, the wasteland was home to a disused water tank and pipes. The owners had to excavated the area and install a full concrete base and drainage before any work was done.

### The Result

After much discussion it was decided that Playrite Conqueror 60MF was the preferred pitch surface for the project. Conqueror is our 3G sports surface range that mimics that of a natural turf area but with lower maintenance costs. Filled with sand and rubber, it will perform at a professional playing standard for football. Near to the end of 2017, self-installation on the project had begun.

The new outdoor development is a fully fenced in 5 a-side pitch with floodlighting which compliments the existing indoor facility. The Soccer Factory is glad to have more facility space for the local 5 a-side teams and junior players to enjoy.
