

## Talybont Community Council

### The Challenge

Talybont-on-Usk is a village in Powys, Wales, lying in the shadow of the breathtakingly picturesque county of Brecknockshire. Situated next to both the River Caerfanell and the Monmouthshire and Brecon Canal, the village is a very popular area with locals and tourists.

The existing worn surfaces no longer fitted the community's requirements and for many years, the community council had been fundraising to upgrade a block of two tennis courts on the village playing field. The criteria outlined by the council, for the synthetic playing surface, was met by the choice of Playrite's Champion 20 - 20mm pile tufted synthetic grass. Their persistence paid off earlier this year when work was able to begin to upgrade the courts.

### The Result

Playrite surface Champion 20 is manufactured in West Yorkshire and is an all-round, hard wearing surface particularly suited for multi-sport use including tennis, netball, football and basketball. This synthetic surface perfectly suited the council's requirements as well as budget for the project.

The installation comprised of approximately 1100 square metres

of material over two separate courts, this was carried out by Inscapes Ltd & Folly Contractors Ltd.

The courts were completed at the start of 2019. The community council are delighted with the facility and know that it will encourage the locals to enjoy the outdoors and have fun whilst getting fitter.
