

## Aintree Davenhill Primary School

With access to extensive grounds, Aintree Davenhill Primary School is able to offer excellent educational experiences that foster an enjoyment of learning that allows every child the opportunity to achieve their full potential.

A part of the external learning practices the school provides for the children is a focus on sports and physical activities.

Working with North-West based Playsound Services Ltd, the school wanted to regenerate an unused area of the schools grounds. After some discussion it was identified that the school was focused on raising awareness of the importance of exercise and well being amongst KS1 and KS2 students.

The team at Playsound Services advised the school that the most suitable option for them to encourage this would be with the installation of a range of outdoor fitness equipment.

After selecting a range of different pieces to feature in the fitness area, the team at Playsound Services recommended that an artificial grass surface be installed to further enhance the design. Having worked with Playrite on previous projects, they advise that the Nearlygrass 30 would be the ideal surface to accompany the equipment.

Playrite's Nearlygrass artificial turf range is manufactured using the finest material and traditional techniques to produce a high quality grass that features a natural look and feel. Made with two tone fibres, the Nearlygrass collection is available in 4 different pile heights with textures to suit every style and budget. The range is a hard wearing and durable surface, and ideally suited as a surface for an outdoor fitness area compared with harsher surfaces such as tarmac.

Collaborating with Playsound Services resulted in a unique fitness area that the school can access all year round and continue promoting exercise and well being for generations to come.
