

Project: Saint-Michel Elementary School, Quebec

Product: Matchplay 2

## Saint-Michel Elementary School, Quebec

Back 2013 the Saint-Michel Elementary School in Quebec transformed their outdoor space and with the help of Playrite's canadian partner Atmosphère, into a multi-use games area with a difference.

With a dynamic environment Saint-Michel Elementary School is run by a committed team determined to provide students with enriching activities that allow everyone to succeed while respecting their needs. With resources dedicated to supporting a small community of autistic students, it is imperative that the school incorporates the natural surroundings to provide an exceptional learning environment.

At the forefront of the specification given to Atmosphère was to create a multi-sports field that could not only be used by the school, but also by the city's recreation department and local day care centre.

The team proposed creating an all year round artificial grass surface which would offer the look of a grass pitch but would allow the area to be used even in the winter months.

After much research into the various artificial grass products that were available, Playrite's Matchplay 2 was chosen.

Specifically designed for multi-use game areas, this particular surface is durable, and hardwearing requires a low sand content, which allows for all year use.

Playrite's Matchplay 2 synthetic grass surface is our most popular sports surface specifically for schools in multi-use games areas as it ticks so many boxes for so many different sports.

Playrite's International Sales Manager Franck Opsomer commented, "It is a testament just how durable this surface really is. It has been 10 years since the surface was originally installed and even with consistent use throughout the year it still remains as good as the day it was installed".

Since the surface was installed, the pitch remains as popular as ever. With regular use by the local community for regional sports events and other local celebrations during the summer months, in the winter months the pitch is transformed into an ice rink.
